

Cybersecurity & AI

Several 3D stars of various colors (green, blue, purple) are scattered in the upper right corner of the slide, adding a decorative, futuristic touch.

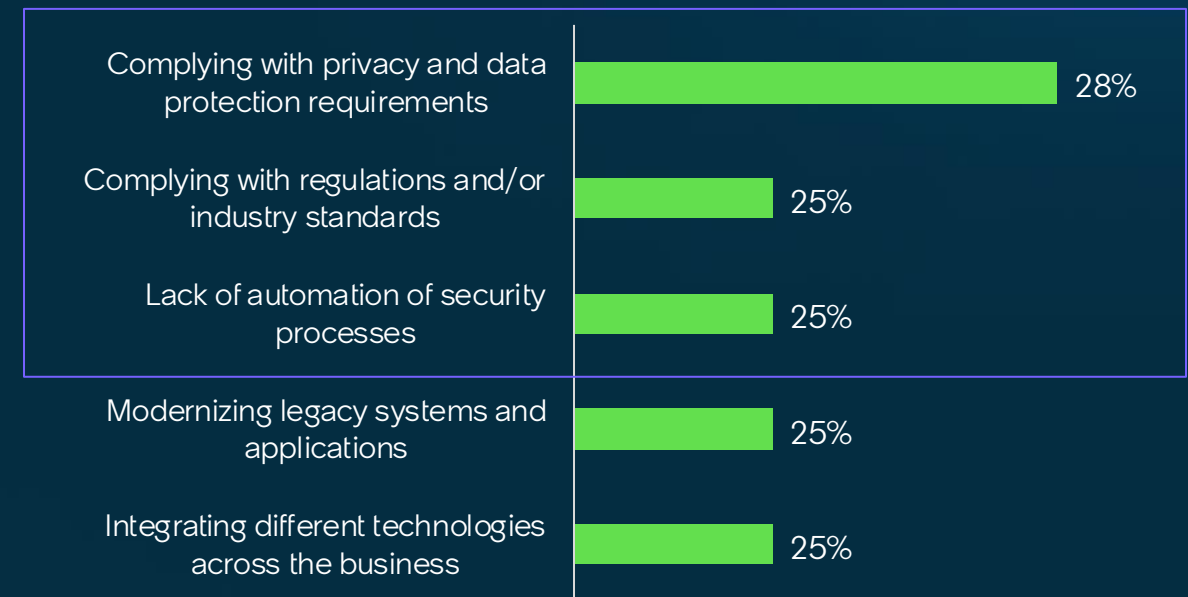

Michael Wallner

Sr. Business Development Manager AI | EMEA Central

System

AI for every use case – on a single platform

Agentic AI

1

WHY

Agentic workflow

This is the overall business problem you're trying to solve—the reason you're deploying AI agents.

Prompt

Response

2

HOW

AI agent Orchestrator

The Orchestrator plans and leads a team of AI agents to solve a specific use case.

Planning

3

WHO

AI agents

The virtual workers that perform specific tasks. AI agents leverage tools like workflow, skill, script, and KB to complete specific tasks.

4

WHAT

Tools

The technologies and resources that AI agents leverage to perform their tasks and achieve the use case.

Real-Time

High

Risk Reduction

1

AI needs data and connected processes to support a stronger cybersecurity

2

AI is a marathon and not a sprint – approach it stepwise and you will succeed

3

Cybersecurity paired with AI capabilities can secure your environment: Triage, Chatbot, Autonomous Systems
